

4200 Optical Module

Preview

The TRICONEX RXM 4200 is an advanced remote fiber optic module designed for seamless integration into industrial automation systems, offering unparalleled reliability and precision in data transmission. Operating Principle: Optical fiber communication Transmission Distance: Up to 20 km. Cisco (R) NCS 4200 Series Network Convergence System interface modules (Figure 1) are designed to support a wide range of services, speeds, temperature ranges, and rich capabilities. Whether interconnecting routers, data centers, or delivering high-end enterprise connectivity, a flexible. The Triconex RXM 4200 extends Tricon I/O operations up to 12 kilometers. It ensures reliable data transfer with strong noise protection.
