

90-degree bend in the bridge structure

Article Overview

The 90-degree bend bridge in Bhopal, India, has become a subject of controversy due to its unusual design.

- o The bridge, which cost \$2.3 million, features a sharp turn that has led to public outcry and ridicule .
- o Experts have noted that the bridge actually bends at 118-119 degrees, not a perfect 90 degrees as initially reported .
- o Following the backlash, seven engineers involved in the project have been suspended, and the construction firms have been blacklisted .

This situation highlights significant concerns regarding the design and safety of the bridge.

What are the main parts of a bridge? Many of us use bridges everyday, but have you ever
