

Article Overview

Key manufacturers of electrical distribution boxes in Africa include Allbro, Schneider Electric South Africa, Twodigits Trading, and PPS Power Process Systems.

Leading Manufacturers

Allbro is a major South African manufacturer of non-metallic enclosures, junction boxes, and DB boards. They produce well-known brands such as York, Okari, Enlec, Utilec, PSO1, and PSO2, all manufactured locally to international standards, suitable for industrial, commercial, and residential applications. Schneider Electric South Africa offers modular electrical distribution boxes that can be surface-mounted or flush-mounted, with metal and techno-plastic options. Their enclosures comply with IEC 61439 standards and are available in 13, 18, and 24 module configurations, catering to both domestic and industrial installations. Twodigits Trading (Pty) Ltd supplies a range of domestic and industrial distribution boards, including surface, flush, and floor-mounted options. Their enclosures are available in mild or stainless steel and are rated from IP44 to IP65, supporting decentralized electrical installations and building automation. PPS Power Process Systems manufactures electrical distribution boards, kiosks, boxes, and LV switchgear to ISO 9000 standards. Their facility produces enclosures in stainless steel, mild steel, DMC/fiberglass, or polyethylene. PPS emphasizes custom specifications, high-quality standards, and rapid delivery, making them a leading supplier for large-scale reticulation projects in South Africa.

Considerations for Selection

When choosing a manufacturer, consider:

- o Material and durability: Options include plastic, mild steel, stainless steel, and fiberglass.
- o Standards compliance: Look for IEC 61439 or SABS certification for safety and reliability.
- o Mounting type: Surface, flush, or floor-mounted enclosures depending on installation needs.
- o Customization: Some manufacturers offer bespoke solutions for OEM or industrial projects. These manufacturers provide a strong starting point for sourcing electrical distribution boxes in Africa, particularly in South Africa, with products suitable for both local and international applications.
