Preview

The explosion-proof distribution box uses explosion-proof, anti-corrosion, and waterproof designs to ensure stable operation under extreme conditions, avoiding production accidents or casualties caused by electrical failures. Wide range of application scenarios Explosion proof distribution boxes and electrical enclosures are critical components for ensuring safety in hazardous environments. These places are more prone to protection accidents.

Explosion-proof distribution boxes are mainly used in coal mines, fire stations, petroleum, petrochemical installations and textile and other flammable and explosive places. These places are more prone to
