Key Insight: The Bahamas has made significant progress in expanding its fiber optic infrastructure, reaching 85% coverage in 2026. We strive to revolutionize communication by providing cutting-edge fiber optic services that empower. Telecommunications in the Bahamas is accomplished through the transmission of information by various types of technologies within The Bahamas, mainly telephones, radio, television, and the Internet. Route of the ARCOS-1 fiber optic submarine communications cable. 22 is Crooked Island, 23 is Cat. From New Providence to the Family Islands, we deliver internet, mobile, and media solutions built for the unique needs of every region. An advanced fibre-optic connection that runs directly to your home, delivering lightning-fast internet for streaming, gaming and working from home without. We're bringing fiber to more homes in The Bahamas than ever before so you can connect more devices and binge non-stop, really non-stop! And for the first time in The Bahamas you get equal download and upload speed. Enjoy equal Download and Upload speeds to power multiple devices. We take a comprehensive approach to secure solutions, providing. Our service is anchored by our Nassau-based submarine fiber optic network, backed by triple-redundant satellite communications, and monitored by Datadragon (TM), our Next Generation Cyber Security and throughput management platform.
