

Article Overview

Cable tray prices in Benin vary widely, typically ranging from \$2 to \$25 per meter depending on material, type, size, and supplier, with bulk orders often offering lower rates.

Local Suppliers and Pricing

Ned-Tech is a leading supplier in Benin, offering galvanized steel, stainless steel, and aluminum cable trays suitable for both coastal and inland conditions. They provide competitive pricing for bulk orders and support contractors with technical guidance on sizing and installation . Brilltech Engineers Pvt. Ltd. also supplies standard and customized cable trays in Benin at affordable rates, catering to industrial and commercial projects . Sammy Light Global offers galvanized and non-galvanized trays nationwide, providing cost-effective options for smaller projects .

Price Factors

Cable tray costs depend on several factors :

- o Material: Galvanized steel is common and durable; stainless steel resists corrosion but is more expensive; aluminum is lightweight and rust-proof; plastic trays are cheaper but not suitable for heavy loads.
- o Type: Ladder trays are robust and cost more; wire mesh and perforated trays are lighter and more affordable.
- o Size and Coating: Larger trays or those with HDG or powder coatings increase costs.
- o Quantity: Bulk orders reduce per-meter cost.
- o Installation and Shipping: Labor and logistics can add to the total project cost.

Typical Price Range

- o Low-end: \$2-\$5 per meter for lightweight wire mesh or plastic trays.
- o Mid-range: \$6-\$15 per meter for galvanized steel perforated trays.
- o High-end: \$16-\$25 per meter for stainless steel or heavy-duty ladder trays.

Recommendations

For projects in Cotonou, Porto-Novo, Parakou, or Abomey-Calavi, sourcing from local suppliers like Ned-Tech or Brilltech ensures timely delivery and technical support. For large-scale projects, requesting bulk pricing and material-specific quotes is recommended to optimize costs while ensuring durability and compliance with local environmental conditions .
