

Budget for Fiber Optic Cable Construction

Preview

Home and business fiber optics projects typically range from a few hundred to several thousand dollars, depending on run length, fiber type, and labor needs. The main cost drivers are materials, installation time, and environmental factors that affect trenching, conduit, and terminations. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Fiber optic network projects for industrial and oil and gas applications typically cost \$15,000-50,000 per mile for aerial installation and \$30,000-80,000 per mile for direct burial. These networks are constructed both underground and through aerial fiber, at an average cost of \$1,000 to \$1,250 per residential household passed or \$60,000 to \$80,000 per mile.

Russia's only domestic producer of optical fiber has been offline since May 2025 following Ukrainian attacks, industry officials told the Vedomosti
