

Article Overview

Cable tray installation in Finland is supported by a range of local suppliers and professional services for industrial, commercial, and marine applications.

Cable Tray Products

In Finland, cable trays are available in various materials and designs to suit different project requirements. Common materials include stainless steel, galvanized steel, aluminum, and fiberglass (FRP/GRP), which provide durability and corrosion resistance for both indoor and outdoor applications . Cable trays come in multiple heights and widths, with slot patterns that allow for efficient cable positioning and easy attachment of cable ties, tubing clamps, and other fixings . Accessories such as brackets, fittings, and specialized components enable flexible and stable installation in complex configurations . Finnish suppliers like MEKA offer a comprehensive portfolio including cable ladders, wire mesh trays, and trunking systems, emphasizing quality, durability, and long life-cycles .

Professional Installation Services

Several Finnish companies provide expert cable tray installation services:

- o IEI Services Oy offers industrial electrical contracting, including cable tray installation, general cabling, and fiber optic systems. They cover design, installation, and commissioning for industrial environments, ensuring compliance with safety and performance standards . Their services extend to medium-voltage and process electrification work, as well as maintenance and repair of existing cable systems .
- o Arctia specializes in marine and offshore cable installations, including underwater cable and pipeline work. They provide complete solutions for laying, installing, and maintaining cable trays in marine environments, using specialized vessels and equipment for flexible and safe operations .

Considerations for Installation

When planning cable tray installation in Finland, consider:

- o Material selection based on environmental conditions (e.g., corrosion resistance for marine or outdoor use).
- o Load capacity and tray dimensions to accommodate the number and type of cables.
- o Compliance with Finnish electrical standards and safety regulations.
- o Accessibility for maintenance, ensuring trays allow easy addition or removal of cables.
- o Professional installation for complex industrial or offshore projects to ensure safety and reliability .

Local Suppliers and Resources

Cable Tray Installation in Finland

- o Onninen provides a range of cable trays and accessories suitable for various electrical projects in Finland .
- o Oglaend System offers modular cable tray systems for both onshore and offshore applications, with a focus on flexibility and durability .
- o MEKA is a Finnish manufacturer providing a wide selection of cable management solutions, including ladders, trays, and wire mesh systems . By combining high-quality products with professional installation services, cable tray systems in Finland can be efficiently implemented for industrial, commercial, and marine applications, ensuring safety, durability, and ease of maintenance.

In this post, we will see together how to install cable tray on-site. Firstly, we need an approved shop

As an industry leader in cable tray, Eaton offers one of the widest ranges of cable management solutions available in the market

Cable Trays and Accessories are designed to meet most requirements of cable and electrical wire installations and comply to local

At Kable Kontrol, we are proud to offer a comprehensive range of electro-zinc wire basket cable trays, available in various sizes and

When it comes to powering, automating and protecting facilities?from factories and petrochemical plants to data
