

Article Overview

Finnish cable tray manufacturers like Meka Pro and Kajote use advanced material selection, precision forming, and automated production to create high-quality cable management systems.

Overview of Finnish Manufacturers

Meka Pro Oy, founded in 1953, is a leading Finnish manufacturer of cable support systems, including galvanized steel and acid-proof steel cable ladders, cable trays, wire mesh trays, and aluminum-frame systems. Their production facility in Oulu uses modern machinery to ensure high-quality standards, and their products are used in industrial, power plant, and commercial projects both in Finland and internationally . Kajote Oy, established in 1960, produces industrial and building cables and emphasizes quality through modern, flexible production machinery and annual inspections by SGS Fimko Ltd . While primarily a cable manufacturer, their processes are closely linked to cable tray integration in infrastructure projects.

Manufacturing Processes

1. Material Selection

Finnish manufacturers carefully select materials based on strength, corrosion resistance, and environmental suitability. Common materials include:

- o Steel: Strong and durable, often galvanized for corrosion protection.
- o Stainless Steel: Used in moist or corrosive environments.
- o Aluminum: Lightweight and cost-effective for lighter cable loads .

2. Cutting and Shaping

Raw materials are cut into precise pieces for the tray base and sides. Precision cutting ensures structural integrity and smooth edges. Shaping involves bending metal strips to prepare them for assembly .

3. Forming and Assembly

Trays are formed by bending and welding the cut pieces into ladder, perforated, solid-bottom, or trough designs. Some manufacturers, like EAE Electric, use roll forming on automated production lines to create standard 3-meter trays efficiently .

4. Surface Treatment

Cable tray manufacturer processes in Finland

To enhance durability, trays may undergo galvanization, powder coating, or acid-proof treatments, depending on the intended environment. This step ensures long-term resistance to corrosion and wear .

5. Quality Control

Finnish manufacturers maintain strict quality standards. Meka Pro and Kajote implement inspections and certifications to ensure compliance with industrial requirements. Automated production lines and precision machinery help maintain consistent quality .

6. Customization and Modular Solutions

Cable trays are often designed for modularity, allowing flexible installation in industrial, commercial, and infrastructure projects. Finnish manufacturers provide solutions compatible with lighting tracks, socket poles, and other integrated systems .

Summary

Finnish cable tray manufacturers combine high-quality materials, precision cutting and forming, automated production, and rigorous quality control to produce durable and reliable cable management systems. Their processes are designed to meet both domestic and international standards, supporting complex industrial and infrastructure projects efficiently.

Explore the cable tray manufacturing process, types of cable trays, and important factors.

Meka Pro Oy is a Finnish company with a business strategy to produce high quality and competitive cable support systems for the

Flexible and custom-made manufacturing services for wires and cables including round, flat and coaxial cables. Our goal is to

All Reka by Nexans cables are manufactured in Finland, and the electricity used in production comes from renewable energy

Nestor cables has a very strong market position in Finland, and its main markets are Europe, the Baltics, the USA and the Middle

How Are Cable Trays Made? To produce cable trays, manufacturers must carefully select

Cable tray manufacturer processes in Finland

Explore leading Cable Tray Manufacturers in Europe, offering durable, compliant solutions for industrial

Meka Pro - Finnish reliable manufacturer of quality cable management systems: cable ladders, cable trays, wire mesh trays, lighting

Find your cable tray easily amongst the 87 products from the leading brands (Legrand, LaCont, Rototherm, ...) on DirectIndustry, the

This list of top 10 online B2B marketplaces and manufacturers will lead you to find your perfect cable trays based on your business

MEKA's product range includes steel cable ladders, cable trays, wire mesh trays, lighting tracks, Solar mounting systems, steel and

Our lines are suitable to manufacture cable trays, in different widths and heights, by just changing the coil and rollforming width. The

In addition to meeting technical specifications, our custom cables and special cables are designed to be durable and long-lasting. We

Thus, cable tray manufacturing has become an important industry, providing innovative cable management solutions

The cable tray manufacturer provides load tables based on standardized testing that considers both the allowable

Setting up a metal cable tray manufacturing plant requires evaluating several key factors, including technological requirements and
