

Article Overview

Canada hosts several leading manufacturers of indoor fiber optic equipment, including ECS Global, Infralink Networks, VisionTek Net Connect, Cablek, and Techlogiks, offering custom assemblies, patch panels, and structured cabling solutions.

Key Manufacturers

ECS Global - Headquartered in Richmond, BC, ECS Global manufactures fiber optic cables, fiber termination boxes, and end-to-end structured cabling systems. Their DME ProLink product line includes a full range of data communication wires and accessories, tested and certified by international laboratories such as UL and Intertek, ensuring high-quality indoor fiber solutions . Infralink Networks - Based in Canada, Infralink specializes in custom copper and fiber optic assemblies, including patch cords, bulk fiber cables, patch panels, connectors, and faceplates. They focus on custom assemblies tailored to client specifications and distribute products through resellers and distributors . VisionTek Net Connect - This company manufactures a comprehensive range of network cabling systems, including fiber optic cables, blown fiber micro ducts, patch panels, keystone jacks, fiber termination boxes, and cable management solutions. Their products are used in structured cabling for commercial, public safety, and instrumentation applications . Cablek - Located in Pointe-Claire, Quebec, Cablek produces fiber optic cables, patch cords, and faceplates. They provide integrated copper and fiber components and maintain ISO9001-certified manufacturing processes, ensuring high-quality indoor fiber optic products . Techlogiks - Based in Mississauga, Ontario, Techlogiks manufactures fiber cables, Ethernet cables, server racks, and fiber & copper connectivity products. They emphasize quality control and ISO9001 certification, serving both Canadian and international markets .

Considerations for Selection

When choosing a Canadian indoor fiber optic equipment manufacturer, consider:

- o Product Range: Ensure the manufacturer offers the specific indoor components needed, such as patch panels, termination boxes, or custom assemblies.
- o Certifications: Look for ISO9001, UL, or CSA certifications to guarantee quality and compliance.
- o Customization: Some manufacturers, like Infralink and ECS Global, provide custom solutions tailored to project requirements.
- o Distribution: Check whether the company sells directly, through distributors, or to resellers, which may affect lead times and pricing. These manufacturers collectively provide a robust selection of indoor fiber optic equipment suitable for commercial, residential, and specialized applications across Canada .
