Dimensions: Standard width is 35mm. Suitable for the majority of general-purpose applications. 15mm (Deep Hat): Designated IEC/EN 60715 - 35 x 15. At its core, a DIN rail is a standardized metal rail that provides a mounting system for all sorts of electrical and industrial control gear you'd find inside equipment racks, enclosures, and control panels. These products are typically made from cold rolled carbon steel sheet with a zinc-plated or chromated bright surface finish. Key factors include environmental conditions, future expansion needs, and. Create space between components mounted on DIN rails for cooling, installing wire, and. Any given point within the frame may be accessed with rail systems.
