PPC's Ultra-High Density (UHD) Chassis is a modular, standards-based, pre-terminated distribution platform designed to increase port density, improve connector access, and efficiently utilize valuable rack space in data centers. The UHD Chassis, in its basic configuration, will serve 72 LC ports. The IW-RS116-E1 is specially designed for high-speed PCIe Gen5 E1. This compact 1U storage server offers impressive capacity, supporting up to 16 E1. The enclosure is equipped with six 40 x 56 mm high-RPM fans that ensure optimal airflow to meet the thermal. High security platform by integrate Intel QickAssist Technology (QAT) to crypto and accelerate packet processing. Support both front & rear power inlets by front PSU design but also reserve AC sockets on rear side. Screwless design including MB, riser slot, drives, hot swappable fans and PSU makes. Actual price may vary (+/-) depending on stock availability, discounts and tax rates applicable at the time. FirstLight™ Ultra High Density 1U Chassis Datasheet FirstLight™ 1U Ultra High Density (FL UHD) Chassis is the part of the system for high density fibre optics infrastructure management in Data

Overview PPC's Ultra-High Density (UHD) Chassis is a modular, standards-based, pre-terminated distribution platform designed to increase port density, improve connector access, and efficiently

The 1U chassis support multiple configurations include SATA hard drives, rackmount chassis and redundant power supply that fulfill server-grade IPC

1U rack-mount enclosure panel allows you to add up to 4 high-density copper or fiber cassettes to your rack installation.

Designed for high density IP video deployments, the MB21 chassis holds any combination of up to 21 Makito X and X4 encoders and decoders in a 4 RU rack.

The enclosure is equipped with six 40 x 56 mm high-RPM fans that ensure optimal airflow to meet the thermal demands of PCIe Gen5. Ideal for customers seeking
