

Article Overview

Leading manufacturers of fully enclosed cable trays include NewReach, MP Husky, and Shilden, offering durable, safe, and customizable solutions for industrial, commercial, and residential applications.

Key Manufacturers and Products

NewReach specializes in enclosed cable trays designed to fully protect electrical cables from physical damage, dust, water, and accidental contact. Their trays feature a hole-free flat bottom for superior protection and are suitable for industrial environments, commercial spaces, and residential applications. NewReach trays simplify installation and maintenance while enhancing cable lifespan and safety in high-risk areas such as factories, power plants, offices, and data centers . MP Husky offers the Husky Way fully enclosed cable tray system, which is economical, easy to install, and designed for complete cable protection. MP Husky is a founding member of the USA Cable Tray Institute and provides a wide range of materials including aluminum, galvanized steel, stainless steel, fiberglass, and PVC-coated options. Their systems meet NEMA, UL, CTI, and CSA standards, making them suitable for diverse industrial and commercial applications . Shilden manufactures a variety of cable tray systems, including solid bottom and channel trays that can be fully enclosed for enhanced protection. Their products are made from stainless steel, galvanized steel, aluminum, and FRP/GRP composites, offering corrosion and fire resistance. Shilden trays are versatile, supporting applications in industrial plants, offshore platforms, data centers, and renewable energy projects, with custom solutions available for specific project requirements .

Considerations for Choosing a Manufacturer

- o Material Selection: Choose based on environmental conditions (e.g., stainless steel for corrosion resistance, FRP for offshore use).
- o Safety and Compliance: Ensure trays meet relevant standards such as NEMA, UL, and CSA.
- o Installation and Maintenance: Look for designs that allow easy access for repairs and upgrades.
- o Customization: Some manufacturers offer tailored solutions to fit unique project layouts.
- o Application Suitability: Consider industrial, commercial, or residential requirements, including load capacity and exposure to elements. These manufacturers provide reliable, fully enclosed cable tray solutions that enhance safety, protect cables, and support efficient electrical infrastructure management.

We offer a wide range of cable tray systems to support tubing, electrical cables and instrumentation. Our cable trays are produced in
