

Article Overview

Here's what you need to know about fiber optic cable splitters for routers:

- o **Function:** Fiber optic splitters are critical components in fiber networks, used to connect a central office to terminal equipment and ultimately to end users in FTTX applications .
- o **Types:** There are different types of fiber optic splitters, including PLC (Planar Lightwave Circuit) and FBT (Fused Biconical Taper) splitters, each serving specific applications .
- o **Usage:** They are used to split the optical signal evenly into several parts at specific ratios, allowing multiple connections from a single fiber optic line .
- o **Purchase Options:** You can find various fiber optic cable splitters available for purchase on platforms like Amazon .
