The ETH-FIBER-SM-ST or ETH-FIBER-SM-SC is a bi-directional externally powered 10/100 Ethernet to Single Mode Fiber Optic Converter which converts a standard 10/100 Ethernet to SC or ST connector type fiber optic link. For high-level immunity to interference and long transmission ranges in industrial applications, media converters transparently convert Ethernet data to fiber optics. Depending on the device and cable, they bridge distances of up to 80 km at data rates of up to 1 Gbps. 3at Power-over-Ethernet standards. Classified as power source equipment (PSE), it enables the centralization of the power supply. VERSITRON manufactures a wide range of fiber optic switches that provide links for your 10Base, 100Base, 1000Base Gigabit, and 10 Gigabit networks simultaneously. A data direction auto-turnaround feature automatically enables the Ethernet.

Can I use fiber instead of Ethernet to get wired connection upstairs ? Hello everyone, I recently bought a house and would like to have wired connectivity on

These Media Converters are used to enable connections of UTP copper-based Ethernet equipment to various optical fiber cable such as multimode, single mode, or single strand fiber.

The EL100-2U series includes unmanaged Ethernet switches with 6/7/8 ports designed for 10/100 MBit/s data transfer. These switches provide flexibility with
