

Article Overview

Fiber optic multimode patch cords typically range from \$5 to \$50 per cable, depending on length, connector type, and OM rating.

Pricing Overview

- o Shorter cables (1-3 meters) with standard LC, SC, or ST connectors generally cost \$5-\$15 each on platforms like Amazon .
- o Medium-length cables (5-10 meters) often range from \$10-\$25, with prices increasing for higher-quality OM4 or OM5 multimode fibers .
- o Longer or specialty cables (15-30 meters, mode-conditioning, or reversed polarity) can cost \$25-\$50 or more, especially when purchased from specialized suppliers like FiberOptics4Sale or Mouser .

Factors Affecting Price

- o Connector Type: LC connectors are generally more expensive than SC or ST due to smaller form factor and higher precision.
- o OM Rating: OM3 and OM4 fibers support higher bandwidth and longer distances, which increases cost.
- o Cable Length: Longer cables naturally cost more due to additional materials and manufacturing.
- o Quantity: Bulk purchases often reduce the per-unit price, especially from distributors like Mouser .
- o Shipping and Tariffs: Some suppliers apply tariffs (e.g., 8-28% in the U.S.) which can affect the final price .

Where to Buy

- o Amazon: Offers a wide range of lengths and connectors for quick delivery .
- o FiberOptics.com: Specializes in multimode patch cords with live chat support for technical questions .
- o FiberOptics4Sale: Provides pre-terminated cables with various connector options and OM ratings .
- o Mouser Electronics: Ideal for bulk orders and professional installations, with detailed pricing tables and tariff information . By considering these factors, you can select a multimode patch cord that fits your budget, network requirements, and installation environment.

Explore durable single-mode and multimode fiber patch cables for seamless data transmission. Available in various lengths and

High Quality Fiber Patchcords are ideal for UV-VIS (190 - 1250nm) or VIS-NIR (300 - 2400nm) ranges with various core sizes
