

Article Overview

Fiber optic patch cord end plugs typically range from \$5 to \$50 per unit, depending on connector type, fiber type, length, and jacket material.

Price Overview

The cost of a fiber optic patch cord end plug varies widely based on several factors:

- o Connector Type: Common connectors include LC, SC, ST, and MPO/MTP. LC and SC connectors are generally less expensive, while MPO/MTP connectors, especially for 12F or 24F cores, require precise alignment and polishing, increasing the price .
- o Fiber Type: Single-mode (OS2) and multimode (OM3, OM4, OM5) fibers affect cost. OM5 fibers for shortwave multiplexing are typically more expensive than OM3/OM4 .
- o Cable Length and Jacket: Longer cables add cost linearly. Armored or LSZH (Low Smoke Zero Halogen) jackets, used for data centers or public buildings, increase the price due to durability and safety standards .
- o Regional Standards: Prices vary by region due to compliance requirements. For example, Europe often requires LSZH materials, while the U.S. may require UL-listed or ETL-verified cords .

Example Pricing

- o A 3-meter LC-LC OS2 patch cord can cost approximately \$10-\$30 per unit, depending on quality and testing standards .
- o Bulk orders or OEM/ODM customization may include setup costs of \$30-\$100, but unit costs decrease with higher volume .

Where to Buy

- o EFB-Elektronik offers a wide selection of patch cords with SC, LC, ST, and MPO/MTP connectors, suitable for various applications .
- o FS Europe provides bend-insensitive fiber patch leads supporting high-speed cabling up to 400G .
- o Amazon and FiberOptic Supply also sell patch cords with varying lengths, fiber types, and connector options .

Key Considerations

When purchasing fiber optic patch cords, consider:

- o Required insertion loss and return loss for signal quality.

Fiber optic patch cord end plug price

- o Compliance with local building codes and fire safety standards.
- o Application environment, such as indoor, outdoor, or data center use.
- o Bulk purchasing to reduce per-unit cost if deploying multiple cords. By evaluating these factors, you can select a fiber optic patch cord that balances performance, durability, and cost for your specific network needs .
