Electrical fires originating from distribution boxes are a serious threat to property and safety. Often, homeowners are unaware that the root cause lies hidden behind the panel, in the quality of the Molded Case Circuit Breaker (MCCB). In 2020-2024, local fire departments responded to an estimated annual average of 46,652 home electrical structure fires. When a circuit breaker trips, it releases a cocked spring mechanism that separates the electrical contacts.
