

# GS4 Pulse High Beam Module

## Preview

The GS4 drive expands the DURApulse family by adding single-phase input capability (ALL 230 VAC drives can be supplied single-phase), a built-in PLC, serial BACnet, and optional EtherNet/IP and ModTCP cards. DURApulse GS4 AC Drive Quick-Start Guide A reference sheet of wiring diagrams and commonly used parameters Problems viewing our PDF files? Do you get a blank screen or other unexpected result trying to open one of our documents in. pdf format? Click here for our PDF troubleshooting guide. Chapter 1: Getting Started anUal verview verview of This ubliCaTion The DURA GS4 AC Drive User Manual describes the installation, configuration, and methods of pUlse operation of the DURA GS4 Series AC Drive. pUlse hould anual This manual contains important information for those who will install. DURApulse GS4 series AC inverters in sizes up to 300hp offer V/Hz or sensorless vector control, Safe Torque Off (STO), 100kA Short Circuit Current Rating (SCCR), a built-in logic controller and a host of other advanced features. All 230V drives (up to the 100 hp model) have single-phase input. Then measure to confirm that the DC bus voltage level between terminals (+1) and (-) is less than 25VDC before touching any terminals. (Will take at least 5 minutes for most GS4 models; 10 minutes for GS4 models  $\geq 40$ hp. Optional EtherNet/IP and Modbus TCP cards available.

AutomationDirect.com | #1 Value in Industrial Automation

Learn why the GS4 Variable Frequency Drive (VFDs) from AutomationDirect are an amazing value that will save you time and your budget. This new line of Variable Frequency Drive can easily be your any

40hp or less, and less than or equal to 10kA RMS for GS4 models of 40hp and larger.

Drives DuraPulse GS4 - Free download as PDF File (.pdf), Text File (.txt) or read online for free.

Prototype hexagonal silicon modules, featuring a new Skiroc2-CMS front-end chip, together with a modified version of the scintillator-SiPM CALICE AHCAL, have been built and tested

Overview The DURApulse GS4 series of AC drives includes many of the same standard features as our GS family of drives including dynamic braking, PID, remov-able keypad, and RS-485 Modbus commu

Receiving and Inspection Drive Package Contents Model Number Explanation Nameplate Information Unpacking Your GS4 dUrapUlse AC Drive Lifting Eye Locations and Instructions Unpacking the

# GS4 Pulse High Beam Module

We then further evaluate waveform-timing performance of the module by comparing with a 10 GS/s oscilloscope in a setup with plastic scintillators and fast PMTs. Different waveform timing algorithms

All GS4 drives have the built-in &quot;3-in-1 Firmware Upgrade Module&quot; that allows you to upgrade not only the drive, but also the firmware in the intelligent keypad, and even the optional Ethernet/IP or

DURApulse GS4 series communication module, EtherNet/IP, 1 port, (1) Ethernet

GS4-2025 Cut Sheet DURApulse GS4 series AC high-performance drive, NEMA 1, 230 VAC, 25 hp with 3-phase input, 10 hp with 1-phase input, SVC or V/Hz mode, C frame,

DURApulse GS4 series AC high-performance drive, NEMA 1, 460 VAC, 50 hp with 3-phase input, SVC or V/Hz mode, D0 frame, RS-485, external dynamic braking unit required.

The GS4 drive expands the DURApulse family by adding single-phase input capability (ALL 230 VAC drives can be supplied single-phase), a built-in PLC, serial BACnet, and optional EtherNet/IP and

We first clarify timing issues of non-uniform sampling intervals regarding a 5 GS/s fast pulse sampling module with DRS4. A calibration strategy is proposed, and as a result, the waveform timing

GSoft2 offers the user a PC based software configuration tool for creating and editing a GS4 Drive configuration. The configuration tool provides access to GS4 Drive parameters in a table format.
