

## Article Overview

Syria has an established cable tray manufacturing sector, with companies like APV Group and Cable House producing galvanized steel trays for industrial and construction applications.

## Key Manufacturers

APV Group, based in Damascus, has been producing cable management systems since 1999. They manufacture a wide range of products including galvanized metal cable trays, press Atop trays, flexible trays, electrical panels, and underfloor boxes. APV emphasizes high-quality standards, accurate measurements, and customization to meet local and regional market demands, aiming to compete with imported products while supporting local employment and skill development . Cable House, operational since 1983, is another recognized manufacturer in Syria. They produce galvanized cable trays, hose clamps, cable ties, crimping tools, and industrial connectors. Cable House focuses on sustainable performance, high durability, and reliable product life, offering customized solutions for both national and international clients .

## Production Materials and Standards

Syrian manufacturers typically use galvanized steel for cable trays to ensure corrosion resistance and long-term durability. Some companies also produce trays in stainless steel, aluminum, or composite materials for specialized applications . The trays are designed in various heights, widths, and slot patterns to accommodate different cable loads and installation requirements, with accessories like brackets and fittings for secure and flexible installation .

## Market and Applications

Galvanized cable trays from Syria are used in industrial, commercial, and infrastructure projects, including electrical distribution, telecommunications, and instrumentation systems. Local manufacturers provide customized solutions to meet specific project needs, ensuring compliance with safety and efficiency standards .

## Summary

Syria's galvanized cable tray production is supported by experienced manufacturers like APV Group and Cable House, offering a range of products with high quality, customization, and durability. These companies serve both domestic and regional markets, providing reliable solutions for cable management in diverse industrial and construction applications .
