This interactive submarine cable map shows global undersea and underwater fiber optic cables connecting continents and countries worldwide. Explore cable routes, landing stations, system status and infrastructure updates. Use the controls at the top to play the animation or step through year by year. For more details and insights, please read this. The Infrastructure Connectivity Map (Broadband maps - BBmaps) webapp provides infrastructure visualization of ICT networks. Projects such as SEA-ME-WE (Southeast Asia - Middle East - Western Europe) and FLAG (Fiber-Optic Link Around the Globe) established intercontinental fiber-optic routes, bridging entire regions with high-speed data links.

A narrow waterway with global digital weight The Strait of Hormuz has long been associated with oil transport, but its role now extends into communications infrastructure. The narrow

Enter or paste your text or upload and convert your Word (DOCX, DOC), PDF, ODT, RTF, and TXT documents to clean HTML.

See the world internet cable map and learn how global internet connections actually work. Updated visuals show undersea cables, chokepoints, Africa's expansion,

It is composed of three segments: (i) The Red Sea submarine festoon cable linking Ras Ghareb, Zafarana and Suez; (ii) ICE- terrestrial segment from Suez to Port

Fiber maps visualize the global network of fiber optic cables, showcasing how data moves across continents and under oceans. Telecommunications providers rely on these maps to optimize routing,

These routes seamlessly integrate with Egypt's existing 10 landing stations and 10 in-service crossing routes, creating a robust and resilient mesh of terrestrial
