The whole brand new S7500E V7 switch series include S7503E-M and S7506E-NonPoE. ? Supports high-density 48 port 10G interfaces line card and can meet the existing and future application requirements of data centers. IRF2 can virtualize up to four S7500E V7 switches into one. Home Products and Solutions InterConnect Switches Products Campus Network Switches Aggregation Switch H3C S7500X Series Switches H3C S7500X Enterprise Core Switch Series The H3C S7500X series switch is designed for the next-generation enterprise core networks. It adopts modular design, uses H3C's. These whole new switch series are perfectly for enterprise network upgrade and maximize your network ROI and reduce your TCO. H3C campus switches integrate the multi-ability of AC, SDN, PON and Security. For intelligent ultra-wideband cloud data center, full-scenario data center products and.

H3C S10500X Switch Series Switch is designed for the core layer of data centers and next-generation campus networks as well as the distribution layer of MANs. It adopts advanced CLOS multistage and

H3C S7500X Switch Series Datasheet - Free download as PDF File (.pdf), Text File (.txt) or read online for free. The document describes the H3C S7500X series enterprise core switches.

S7500E switch series has been one of the best-selling products since it has been released worldwide nine years ago, with H3C's proprietary operating system upgrade from V5 to V7, S7500E switch

Integrated: Multi-service H3C campus switches integrate the multi-ability of AC, SDN, PON and Security.

H3C S10500X series switch is designed for the core layer of data centers and next-generation campus networks as well as the distribution layer of MANs. It provides the following features: Advanced

H3C industrial switches can operate in -40°C - 75°C environments for a long time, and use industrial components to reach IP40 rating. At the same time, with shockproof, anti-electromagnetic

H3C S10500 Series Switches The H3C S10500 switch series is designed for the data center cloud networks, next-generation enterprise core networks, and MAN convergence.

These all-new series switches are ideal for enterprise network modernization and provide maximum return on investment and reduced total cost of ownership. The all-new S7500E V7 series switches

H3C S7500E V7 switch series comes with IPv4/IPv6 dual-stack platform that provides sophisticated IPv4/IPv6 solutions by supporting multiple tunnels, IPv4/IPv6 Layer 3 routing protocols, multicasting,

H3C7 Series Core Switches

The H3C S7500E Series of modular core switches is the next generation of multi-layer switches that meet the evolving needs of integrated services networks.

H3C's S7500X series switches are designed for use at the core of next-generation enterprise networks.

H3C S7500X switch series is the first of its kinds in the industry to support wire speed performance for high density 10G/40G/100G line cards and can meet the existing and future application requirements

These whole new switch series are perfectly for enterprise network upgrade and maximize your network ROI and reduce your TCO. The whole brand new S7500E V7 switch series include S7503E-M and

With a range spanning ten series and hundreds of switches, H3C's options can cover your networking needs - from the data center core to campus access and

Overview The H3C S7500X switch series is designed for the next-generation enterprise core networks. It uses H3C's proprietary operating system Comware V7 and provides the following features:
