

How big of a wireless router should I choose for a 20m fiber optic connection

Preview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Instead of using your old router, a high-performance Wi-Fi router designed for fiber optic internet will ensure you seamless streaming, online gaming, and remote work all over your space. With the many options available on the market, picking the best router for fiber internet can be tricky. Therefore, to help you choose the best routers for fiber internet, the guide below consists of the top options for fiber internet. This article provides a comprehensive review and buying guide designed to assist in identifying the best routers for fiber internet.

We will explore key performance metrics, essential features such as Wi-Fi standards and port configurations, and examine a range of router models optimized for fiber connectivity.
