

How much does a good fiber optic patch cord from Argentina cost

Article Overview

A good-quality fiber optic patch cord in Argentina typically costs between \$10 and \$50 USD per unit, depending on type, length, and connector quality.

Price Range and Factors

In Argentina, fiber optic patch cord prices vary based on fiber type, connector type, length, and quality standards. For example:

- o Single-mode (OS2) or multimode (OM3/OM4) patch cords generally range from \$10 to \$30 USD for standard 1-3 meter cords. Premium or armored versions can cost \$40-\$50 USD or more per unit .
- o Connector types such as LC, SC, FC, or MPO/MTP influence cost, with MPO/MTP and high-precision connectors being more expensive due to alignment and polishing requirements .
- o Armored or LSZH (Low Smoke Zero Halogen) jackets add 20-50% to the base price, providing extra protection for harsh environments or data center installations .
- o Bulk orders can reduce unit costs, while custom labeling or testing reports may increase the price slightly .

Local Market Considerations

Argentina's fiber optic market is growing, with suppliers like Fibrashop offering customized patch cords and cables for enterprise, industrial, and residential applications . Prices may fluctuate due to import costs, shipping, and local taxes, so contacting local distributors for a proforma invoice is recommended for precise budgeting .

Summary

For a high-quality, standard-length fiber optic patch cord in Argentina, expect to pay roughly \$10-\$50 USD per unit, with higher prices for armored, longer, or specialized connectors. Bulk purchases and local supplier negotiations can help reduce costs while ensuring compliance with performance standards .

Get low-loss fiber patch cables & cords with various connector options that support fiber optic cabling up to 400G. 100% tested.

When choosing fiber optic cable patch cord, consider the actual length needed, material
