

How much does a level 3 electrical distribution box cost in Senegal

Article Overview

A level 3 electrical distribution box in Senegal typically costs between USD 500 and USD 1,500, depending on specifications, installation, and supplier.

Estimated Price Range

While exact local pricing is not publicly listed, distribution boxes in residential, commercial, and industrial settings generally range from USD 500 to USD 1,500 for mid-to-high capacity units with advanced features such as multiple circuits, smart monitoring, and weather-resistant enclosures . In Senegal, suppliers like Legrand and 3MD Energy provide distribution boards and prefabricated electrical units, which may influence pricing based on local manufacturing, import duties, and installation services .

Factors Affecting Cost

- o Voltage and Amperage Rating: Higher voltage or three-phase systems cost more than standard single-phase residential units .
- o Number of Circuits: More circuits increase the complexity and price of the box.
- o Material and Durability: Outdoor-rated or corrosion-resistant enclosures, especially in coastal areas, carry a premium .
- o Technological Features: Smart monitoring, remote control, and digital displays add to the cost .
- o Installation and Maintenance: Local labor, wiring, and compliance with SENELEC standards can significantly affect the total investment .

Local Market Context

Senegal's distribution network is expanding, with SENELEC operating over 12,000 substations and 46,000 km of distribution lines, creating demand for modern distribution boards . Programs like PADAES and industrial electrification projects in Dakar and Diamniadio are driving the adoption of higher-specification boards, which may increase the prevalence of level 3 units in commercial and industrial projects .

Recommendation

For an accurate quote, it is advisable to contact local suppliers directly, such as Legrand Senegal or 3MD Energy, providing details about voltage, amperage, number of circuits, and installation requirements. This ensures the price reflects both the hardware and local service costs.
