

How to choose the model of the fiber optic box for your home

Preview

When selecting an FDB, it is recommended to choose models equipped with essential features such as fusion splice trays, SC/LC adapters, bend-radius protection, and slack cable storage. The ideal choice depends on your environment--indoor boxes typically require compact size and easy access, while outdoor enclosures must be. A fiber distribution box (FDB) is a passive enclosure that provides secure splicing, termination, and distribution of optical fibers. FDBs are used to organize incoming and outgoing cables. The best fiber optic box for you depends on your project's space, how many cables you have, and how safe you need it to be. First, check where you want to put the box. Pick a box made from strong material.
