

Article Overview

Huawei fiber optic router LEDs indicate power, network connection, data transmission, and service status, with each light color and behavior signaling specific operational conditions.

Common LED Indicators and Their Meanings

1. POWER LED

- o Solid green: Router is powered on and functioning normally.
- o Off: Router is off or power connection is faulty; check the power adapter and ON/OFF button .

2. PON LED (Passive Optical Network)

- o Solid green: ONT/ONU is successfully registered with the OLT.
- o Blinking: Data is being transmitted.
- o Off: No optical connection; check fiber cable and optical port .

3. LOS LED (Loss of Signal)

- o Blinking slowly: Fiber cable may be disconnected or connector contaminated.
- o Blinking quickly: Optical signal is being transmitted but may indicate a line issue.
- o Solid or off: LOS off usually indicates a serious connection problem .

4. LAN LEDs (LAN 1-4)

- o Solid green: Device connected to LAN port.
- o Blinking green: Data is being transmitted through the LAN port.
- o Off: No device connected or LAN cable issue .

5. WLAN LED

- o Solid green: Wi-Fi service is active.
- o Off: Wi-Fi is disabled; check router settings .

6. WPS LED

- o Blinking green: WPS pairing is in progress.

Huawei Fiber Optic Router Indicator Lights

- o Off: WPS service not started .

7. TEL LED (Telephone service)

- o Solid green: Voice service is configured and active.
- o Off: No voice service or not enabled; check configuration .

8. USB LED

- o Solid green: USB device connected and recognized.
- o Off: No USB device detected or connection issue .

9. CATV LED (if applicable)

- o Solid green: CATV service active.
- o Off: No CATV signal; confirm subscription or signal availability .

Troubleshooting Tips

- o No POWER LED: Verify power adapter, outlet, and ON/OFF button.
- o PON or LOS issues: Inspect fiber cable, clean connectors, and ensure proper registration with the OLT. Contact your service provider if the problem persists.
- o LAN/WLAN problems: Check cables, network adapter status, and router settings.
- o TEL/USB/CATV issues: Confirm service activation and device compatibility .

Understanding these LED indicators helps quickly identify connection problems, service status, and device functionality on Huawei fiber optic routers, enabling effective troubleshooting and maintenance.
