

Huawei S6720 Switch with Optical Module

Preview

The S6720-LI series switch includes three models with a switching capacity of 1.8Tbps, supporting packet forwarding rates of 240Mpps and 480Mpps. It is equipped with high-density 10GE and 40GE ports and is typically paired with 10G SFP+ optical modules and 40G. When the optical module on an interface is faulty, you can run the display commands to view information about the optical module. Related Information Video Identify a Huawei-Certified Optical Module Run the display transceiver [interface interface-type interface-number | slot slot-id] [verbose]. Why Does the S5700 Fail to Restrict User Access Through a Traffic Policy (V200) What is TACACS and How to Configure TACACS? What is BPDU Protection and How to Configure BPDU Protection? What Is a Trunk Link What Is a Microburst and How to Detect a Microburst (V600) What Is Mirroring What If I. The S6720-LI series, a new generation of Huawei's compact all-10G box switches, is designed for use in campus networks and data center 10G access. In addition, the S6720-LI help customers build scalable, reliable, manageable, and secure campus and data center networks. In this article, ETU-LINK will introduce the port configuration, advantages and optical module matching solutions of.

Product Overview Huawei S6720-SI series switches are Huawei-developed next-generation multigigabit 10GE fixed switches. The S6720-SI can provide high-speed wireless access, and access for 10GE

The S6720-LI series switch includes three models with a switching capacity of 1.28Tbps/12.8Tbps, supporting packet forwarding rates of 240Mpps and 480Mpps. It is equipped
