

Instructions for Ground Pump Distribution Box

Preview

Check for proper IP/NEMA ratings and material quality. Ensure safe placement: install in dry, accessible areas with good ventilation and at appropriate height (typically ~1. Practice good wiring: secure grounding, neat cable management, proper insulation, and correct wire. This document provides installation information for the Universal Distribution Box PA0261. The distribution box provides an interface between Gilbarco consoles with two-wire current loop (TWI) interface and dispensing units or G-SITE(R) controllers with RS-422 interface and dispensing units, CRIND(R)s. Power from factory ground must be installed by a qualified electrician. Each DISTRIBUTION BOX and controller must be grounded. 26 mm² (10 AWG) ground wire must be used, and in all other markets a 6 mm² must be used. For personal safety, as well as protection of the equipment and components, always remove power from the equipment before removal or reconnection of any component. SEE INSTRUCTIONS TO SWITCH OFF YOUR EXISTING PUMP to the existing power lines, problems, missing parts?
