JFC reinforced fiber optic connectors use standard FC fiber optic connection interfaces, and anti-misplugging and unplugging design is one of its important features. Unlike fiber splicing, which is permanent, connectors allow for easy connection and disconnection of cables, making them ideal for maintenance and flexibility in. Amphenol's 100G QSFP28 optical modules include SR4, AOC, AOC break out, CWDM4, LR4, ER4 Lite, ER4 and ZR4 series, which adopt LC or MPO optical ports and are compatible with IEEE802.3bm, SFF-8636 and other standards; With low power consumption and small size, it is mainly used in 100G data center. ITT Cannon expands its wide range of highly engineered fiber optic termini with the qualification of KJ Connectors to JSFC15 and JSFC16 in addition to JSFC17 optical sockets and JSFC18 optical pin termini for aerospace applications such as the F-35 Joint Strike Fighter (JSF) platform. ?
