

Article Overview

Jamaica is actively expanding its fiber optic infrastructure through government-led projects, sub-sea cable investments, and local suppliers to improve connectivity and reduce costs.

Government Initiatives

Jamaica is investing in a sub-sea fiber optic cable project in partnership with Trans Americas Fiber System, with costs estimated between US\$45 million and US\$55 million. This project aims to increase digital infrastructure resilience, reduce connectivity costs, and provide redundancy, as currently about 90% of Jamaica's data traffic relies on sub-sea cables, and there is only one existing provider . Additionally, the National Broadband Initiative (NBI), financed by the Ministry of Science, Energy, Telecommunications and Transport (MSETT) and the Universal Service Fund (USF), is procuring fiber optic cables and accessories for multiple locations, including St. Ann and Milford Road to Walkerswood, with turnkey installation contracts lasting 120 days .

Market Overview

The Jamaica fiber optic cable market is monitored for trends, growth drivers, and export potential. Market analysis highlights emerging demand, revenue forecasts, and opportunities for businesses to expand regionally and globally . The government's efforts to increase capacity are expected to lower costs for consumers and businesses, encouraging new industries and data-dependent enterprises .

Local Suppliers and Service Providers

Several companies provide fiber optic products and services in Jamaica:

- o TELiCON Group offers design, installation, and maintenance of fiber optic networks, IT infrastructure, and telecommunication systems .
- o Diginet Jamaica supplies structured cabling, networking, telephony systems, and fiber optic components, catering to both small businesses and large corporations with long-term warranties . These providers support both installation and maintenance, ensuring that businesses and government projects have access to reliable fiber optic infrastructure.

Key Takeaways

- o Jamaica is expanding fiber optic capacity through sub-sea cables and national broadband projects.
- o Government initiatives aim to reduce costs and improve redundancy in the network.
- o Local suppliers like TELiCON and Diginet Jamaica provide comprehensive solutions for installation,
