

Article Overview

LC pigtail jumper cables are widely available from manufacturers like KOC, Multilink, FiberCheap, and Fiber4u, with prices varying based on fiber type, length, and connector specifications.

Manufacturers and Product Options

- o KOC (Shenzhen, China): Offers LC pigtail jumper cables in simplex, duplex, multi-core, and ribbon types. They provide customized solutions for telecommunication, CATV, and network applications, with ISO9001:2000 quality management and competitive pricing for bulk orders .
- o Multilink: Supplies LC fiber optic jumpers and pigtails for indoor and outdoor use. They provide an online configurator to design assemblies with SC, LC, ST, and other connectors, including insertion loss testing for quality assurance .
- o FiberCheap: Offers LC duplex single-mode pigtails (9/125 um, 2.0 mm) in standard lengths (1m, 2m, 3m, 5m). These are typically unjacketed for splice tray protection and are suitable for indoor network installations .
- o Fiber4u Technologies: Provides LC pigtails in single-mode and multimode (OM1-OM4) fibers, with standard lengths of 1.5 meters and custom lengths available. Their products feature low insertion loss (0.10-0.15 dB typical) and high return loss (55-65 dB), suitable for professional telecom and data center applications .

Pricing Overview

- o Prices for LC pigtail jumper cables vary depending on fiber type, length, and connector polish. For example, standard single-mode LC pigtails typically range from \$1.50 to \$5 per unit for small quantities, while bulk orders or custom assemblies may reduce the per-unit cost. Multimode or specialty cables (OM4, APC polish) may cost slightly more due to higher performance specifications .
- o Many manufacturers provide custom quotes based on order volume, cable length, and connector type. Using online configurators (like Multilink) or contacting suppliers directly is recommended to obtain precise pricing for specific project requirements .

Key Considerations

- o Fiber Type: Single-mode (SM) for long-distance, multimode (OM1-OM4) for shorter distances.
- o Connector Type: LC is common for high-density applications; ensure compatibility with your equipment.
- o Polish Type: UPC (Ultra Physical Contact) or APC (Angled Physical Contact) affects return loss and signal quality.
- o Length and Customization: Standard lengths are available, but custom lengths can be requested for specific installations.

LC pigtail jumper cable manufacturer price

o Quality Standards: Look for ISO-certified manufacturers and tested insertion/return loss to ensure reliable network performance. For procurement, it is advisable to request quotes from multiple suppliers and compare specifications, lead times, and after-sales support to select the best option for your network needs.

Mefiberoptic.com is one of the leading China manufacturers and suppliers providing you with LC UPC 12 Fiber Pigtail MM OM1
