

Article Overview

Izotermis is a leading Latvian manufacturer specializing in insulated pipes and cold-joint solutions.

Izotermis, founded in 1991, is one of the foremost manufacturers in Eastern Europe for insulated pipes and metal structures, with main production facilities in Latvia and Finland . The company provides high-precision engineering solutions for district heating networks, industrial facilities, and infrastructure systems, making it a key player in cold-joint pipe technology . Over 35 years, Izotermis has completed more than 2,340 projects, demonstrating extensive experience in both standard and complex engineering applications .

Products and Services

- o Insulated Pipes and Cold-Joint Systems: Designed for thermal efficiency and durability in industrial and municipal applications .
- o Metal Structures: Custom-engineered steel structures for industrial and infrastructure projects .
- o Engineering Solutions: Full project support including design, fabrication, and installation .
- o Digital Transformation: Recent investments in digital processes enhance project management and sales efficiency .

Certifications and Quality

Izotermis emphasizes high-quality standards, using modern technologies and certified materials to ensure compliance with EU regulations . Their engineers provide detailed project planning and quality control, including testing of durability and welding joints, which is critical for cold-joint reliability .

Other Latvian Industrial Manufacturers

While Izotermis specializes in cold-joint and insulated pipes, other Latvian companies like Baltmet focus on steel structures, beams, and reinforcement products, and UPB Group provides large-scale construction and engineering services . These companies may complement cold-joint projects but do not specifically manufacture insulated pipe systems. Conclusion: For cold-joint and insulated pipe solutions in Latvia, Izotermis is the primary manufacturer with extensive experience, certified production, and a strong project portfolio, making it a reliable choice for industrial and infrastructure applications .
