

Location of Saudi Arabian Optical Cable Faults

Preview

On Saturday, September 6, 2025, multiple submarine fiber-optic cables were severed near Jeddah, Saudi Arabia, leading to significant disruptions in cross-regional internet traffic. Specialised ships like the 'NKT Victorial' use various tools to find the exact location of the cable cut, retrieve the cable, splice the damaged sections (replacing damaged sections with new cable segments), test and lower back to the seabed. Subsea cable repairs are not an easy fix, according to. A sudden failure in undersea cables running through the Red Sea has slowed the digital heartbeat of Asia and the Middle East, leaving millions of users grappling with sluggish connections. A sudden failure in undersea cables running through the Red Sea has slowed the digital heartbeat of Asia and.
