

Article Overview

Primary distribution boxes in Mexico are typically custom cardboard or corrugated boxes used to transport products from manufacturers to distribution centers or retailers, supported by a robust logistics network and specialized packaging suppliers.

Packaging Suppliers

Mexico has several manufacturers that provide primary distribution boxes tailored to industrial and commercial needs:

- o Multiempaques del Norte offers cardboard and corrugated boxes, including reinforced and integrated pallet designs, dividers, die-cut specialties, and honeycomb structures. They provide services such as scheduled deliveries, kanban supply, printing, labeling, and assembly to optimize packaging for controlled environments and reduce operating costs .
- o PCM - Papeles y Conversiones de Mexico manufactures custom cardboard boxes with high-quality flexographic printing, delivering within 7-10 days. They focus on reducing inventory costs, optimizing production, and adapting packaging to specific product requirements . These suppliers can produce boxes ranging from individual units to large gaylord boxes, suitable for primary distribution in retail, industrial, or eCommerce channels.

Distribution and Logistics

Mexico's distribution network is extensive and strategically organized:

- o Logistics Hubs: Key hubs are located in Tijuana, Ciudad Juarez, Chihuahua, Guanajuato, and Queretaro. These hubs serve as central points for distributing products across the country and to international markets, linking North America with Central and South America .
- o Transportation Infrastructure: Products are transported primarily by truck (58.3%), train (13.8%), ship (27.8%), and air (0.1%) for domestic consumption. Major ports include Veracruz, Manzanillo, Lazaro Cardenas, and Altamira, supporting intermodal and door-to-door delivery .
- o Retail and eCommerce Channels: Large retailers like Walmart de Mexico, Coppel, El Palacio de Hierro, and Mercado Libre are major importers and distributors, often requiring standardized primary distribution boxes for efficient handling and storage .

Considerations for Primary Distribution Boxes

When selecting primary distribution boxes in Mexico, consider:

Mexico Primary Distribution Box

- o Material and Strength: Corrugated or reinforced cardboard is preferred for heavy or fragile products.
- o Size and Customization: Boxes should fit product dimensions and allow for stacking and palletization.
- o Supply Chain Integration: Suppliers offering kanban, just-in-time delivery, and labeling services can streamline distribution.
- o Regulatory Compliance: Ensure packaging meets local transport and safety standards, especially for food, pharmaceuticals, or electronics.

Summary

Primary distribution boxes in Mexico are a critical component of the supply chain, enabling safe and efficient transport from manufacturers to distribution centers and retailers. Leveraging local suppliers like Multiempaquas del Norte and PCM, combined with Mexico's well-established logistics hubs and transport infrastructure, ensures reliable distribution across the country and into international markets .
