

## Article Overview

Leading manufacturers of network server room cabinets include Legrand, EDP Europe, FS Europe, OTRANS, and Lehmann IT, offering both standard and customizable solutions for data centers and IT environments.

## Key Manufacturers and Offerings

Legrand provides a wide range of fully enclosed server and network cabinets with flexible frame styles in tubular steel, aluminum, or sheet metal. Their cabinets support load capacities up to 5,000 lbs and come in heights from 42-52RU, depths of 36" to 54", and widths of 600mm to 800mm. Legrand also offers seismic-certified cabinets suitable for high-vibration environments, along with pre-configured or fully customizable solutions for enterprise, hyperscale, and edge data centers . EDP Europe supplies server and communications enclosures in various widths, depths, and heights. They offer both leading manufacturer products and their own range of cabinets, including specialized solutions like chimney racks, multi-compartment co-location enclosures, and soundproof cabinets ideal for edge computing . FS Europe provides a portfolio of server racks and cabinets designed for secure and complete infrastructure solutions, catering to both high-density data centers and smaller server rooms . OTRANS specializes in robust and scalable server cabinets with over 20 years of experience. They offer OEM and ODM services, allowing customization of dimensions, color, perforation patterns, and internal layouts. Their cabinets optimize space, improve thermal performance, and enhance cable management, making them suitable for high-density deployments . Lehmann IT manufactures 19-inch server and network cabinets with heights ranging from 10 to 42 HE. They provide both closed and open cabinet designs, including soundproofed and actively cooled options. Their cabinets can be equipped with air-conditioning units, water cooling systems, or passive rear cooling doors to manage high-density heat loads efficiently .

## Considerations for Choosing a Manufacturer

- o Customization: If your project requires specific dimensions, layouts, or color schemes, manufacturers like OTRANS and Lehmann IT offer extensive customization options.
- o Thermal Management: For high-density server rooms, consider cabinets with active or passive cooling solutions.
- o Seismic and Vibration Certification: Legrand offers cabinets certified for earthquake-prone or high-vibration environments.
- o Noise Reduction: Soundproof cabinets from EDP Europe and Lehmann IT are ideal for edge computing or office-adjacent server rooms.
- o Deployment Scale: Choose manufacturers that can support your scale, from compact server rooms to hyperscale data centers. These manufacturers provide a range of solutions to meet diverse IT infrastructure needs, from standard racks to fully engineered, high-performance server cabinets.
