Space Norway is set to establish new high-speed connection from the Norwegian mainland to Jan Mayen and Svalbard archipelago. The Arctic Way Cable System is developed by Space Norway, supplied by. Space Norway launches "Arctic Way": the world's northernmost subsea cable system. Photo: David Coughlan, CEO of SubCom, and Morten Tengs, CEO of Space Norway, sign the contract for the Arctic Way Cable System. The capacity of the cable is not yet known.

Discover fibre optic cables connecting Svalbard to mainland Norway, supporting government, residents,

Located entirely within the Arctic Circle (between 67-78°N), the system will be the world's northernmost subsea cable system and will

Essentially, there are four crucial steps to installing aerial optical cables correctly:

The NO-UK cable system has achieved a record-breaking 800Gbps line rate using Ciena's GeoMesh Extreme,

Underground fiber optic cable installation is critical for businesses looking to achieve stable, high-speed connectivity.

Where previously buried cables were cost-effectively limited to a maximum rating of 11 kV, gradual improvements in materials and

For longer distances, fiber-optic cables are typically installed by hanging them between poles (aerial), laying them on

Oslo, NORWAY and Newington, NH, USA - May 1, 2025 - Space Norway and SubCom today announced that a contract is in-force

Some fiber optic cables that are appropriate for both aerial and underground applications and then some that are

In the digital age, underground fiber optic cable serve as the invisible arteries of global communication, enabling

Outside Plant Construction Guide Introduction Review Of Fiber Optic Technology. Project Preparation And

Guidelines. Underground

Space Norway has signed a contract with SubCom for the full system supply of the Arctic Way Cable

Designing a fibre optic network involves far more than selecting the right fibre grade. The physical deployment method

In the realm of FTTH applications, the choice between aerial and underground fiber optic cable deployment depends on various

Outside Plant Fiber Optics Lesson 3: Underground Cable Construction Objectives: From this lesson you

Space Norway delivers essential satellite services to governments, commercial maritime and land-based industries, as
