

Article Overview

Nivetti's NSP-24F is a fully managed 1G aggregation switch designed for enterprise and data center networks.

Overview

The NSP-24F from Nivetti, a Norwegian manufacturer, is a 24-port Gigabit Ethernet SFP switch with 4 additional 1G/10G SFP+ aggregation ports, making it suitable for consolidating traffic from multiple access switches or edge devices into a high-bandwidth uplink to core switches or routers . It operates as a Layer 2/Layer 3 switch, supporting advanced routing, traffic management, and security features.

Key Features

- o High Availability and Resiliency: Dual hot-swappable power supplies and fans ensure continuous operation even during power failures .
- o Centralized Management: Supports REST APIs, Zero Touch Provisioning (ZTP), and TWAMP for monitoring and configuration via a centralized SDN controller .
- o Security and Policy Control: Integrates with RADIUS, TACACS+, and COA for centralized policy enforcement and supports popular Network Access Control (NAC) solutions .
- o Energy Efficiency: Implements Energy Efficient Ethernet (EEE) to reduce power consumption during low activity periods .
- o Rapid Recovery: ERPS (Ethernet Ring Protection Switching) provides sub-50ms switchover in case of link or node failure, ideal for mission-critical applications .
- o Flexible Deployment: Can function as an aggregation switch, SAN switch, or multi-purpose L2/L3 switch, supporting both server and storage traffic aggregation .

Deployment Scenarios

The NSP-24F is suitable for:

- o Enterprise Networks: Aggregating multiple access switches and providing high-speed uplinks to core switches.
- o Data Centers: Consolidating server and SAN traffic with multiple 10G SFP+ uplinks.
- o Carrier or Service Provider Networks: Integrating with existing fiber infrastructure for reliable 1G aggregation .

Comparison with Other Options

Norwegian manufacturer s 1G aggregation switch

Other Norwegian or regional options include HPE Aruba 1G aggregation switches, which are optimized for IoT density and support multi-gigabit Ethernet, high-power PoE, and up to 100G uplinks . These switches are stackable, support Layer 2/3 features, and are suitable for campus, data center, and aggregation deployments.

Conclusion

For organizations seeking a Norwegian-manufactured 1G aggregation switch, the Nivetti NSP-24F offers a robust, fully managed solution with high availability, centralized management, and flexible deployment options. It is particularly well-suited for enterprises, data centers, and service providers requiring reliable 1G aggregation with advanced Layer 2/3 capabilities .
