

Article Overview

Key PDU smart meter manufacturers in Peru include Integrity Peru, Legrand Peru, and Forza, offering advanced energy monitoring and management solutions for data centers and industrial applications.

Integrity Peru

Integrity Peru specializes in monitored PDUs designed for high-efficiency energy management in data centers. Their PDUs, branded as InfraPower, provide real-time measurement of current (AMP), voltage (Volt), power (kW), energy consumption (kWh), and power factor with an accuracy of $\pm 1\%$. They offer both standard and custom configurations to meet specific rack and load requirements. The vertical PDU enclosures are slim (54 mm) for efficient rack installation, allowing dual mounting on one side for cable management. Safety features include resettable fuses or hydraulic MCBs to protect against overloads.

Legrand Peru

Legrand offers intelligent PDUs with real-time power monitoring and environmental sensing. Their PDUs support remote management, including switching of active power and alarm notifications for voltage, current, and energy usage (kWh). Multiple configurations are available to suit LAN networks and data center environments. Legrand PDUs are designed for easy installation and provide precise energy consumption data for efficient load management.

Forza

Forza has launched a new line of measurable and intelligent PDUs for the Peruvian market, suitable for 110V and 220V environments, both horizontal and vertical. Their models, such as FPD-1012M1U and FPD-3012M0U, feature real-time energy monitoring, digital displays, and LED indicators for surge protection. The iPDU models, like FPD-30120US, allow remote monitoring and management via a web interface using SNMP, enabling administrators to optimize energy usage and prevent overloads.

Market Context

The Peruvian market for smart metering and PDUs is growing, driven by energy efficiency initiatives and digitalization of the energy sector. Utilities and large-scale data centers are increasingly adopting smart PDUs to monitor energy consumption, reduce operational costs, and improve reliability. Local suppliers provide both standard and customizable solutions to meet the diverse needs of industrial, commercial, and IT infrastructure applications. These three manufacturers--Integrity Peru, Legrand Peru, and Forza--represent the primary options for PDU smart meters in Peru, offering a combination of precision measurement, remote management, and safety features suitable for modern energy management requirements.
