

Price List of Waterproof Electrical Distribution Boxes in North Africa

Article Overview

Waterproof electrical distribution boxes in North Africa typically range from \$30 to \$200 USD depending on size, material, and features.

Overview

Waterproof or weatherproof electrical distribution boxes, also known as DB boards or enclosures, are designed to protect electrical components from moisture, dust, and environmental exposure. They are commonly made from glass-reinforced polyester (GRP), polycarbonate, or non-metallic plastics, which provide durability and corrosion resistance suitable for outdoor installations .

Price Ranges

- o Small plastic or GRP enclosures (up to 12-way): Approximately \$30-\$60 USD. These are suitable for residential or small commercial applications .
- o Medium-sized enclosures (12-24-way): Typically \$60-\$120 USD, often used in larger residential or light industrial setups .
- o Large industrial-grade enclosures (24+ way, heavy-duty, metal or reinforced plastic): Can cost \$120-\$200 USD or more, depending on certifications, IP rating, and brand .

Factors Affecting Price

- o Material: GRP and polycarbonate boxes are more expensive than standard plastic but offer better weather resistance.
- o Size and Capacity: Larger boxes with more circuit slots or compartments cost more.
- o IP Rating: Higher ingress protection (IP65-IP67) increases price due to enhanced waterproofing.
- o Brand and Certification: Internationally certified enclosures (IEC, UL) are priced higher than local generic models.
- o Local Availability: Import duties, shipping, and local distribution networks in North Africa can affect final retail prices.

Purchasing Tips

- o Check local electrical wholesalers or distributors in Morocco, Algeria, Tunisia, and Egypt for competitive pricing.
- o Consider bulk purchases for industrial projects to reduce per-unit cost.
- o Verify IP rating and material specifications to ensure suitability for outdoor or harsh environments. In summary, while exact North African prices vary by country and supplier, expect to pay between \$30 and \$200
