

Article Overview

Pricing for Italian long-span cable trays varies widely depending on material, size, and load capacity, and is typically obtained via direct quote from manufacturers or distributors.

Overview of Italian Long-Span Cable Trays

Italian manufacturers such as Schiavetti Tekno (part of Spina Group) produce high-quality cable trays designed for industrial and infrastructure applications . These trays are available in stainless steel, hot-dip galvanized steel, and aluminum, and come in various types including ladder, perforated, and closed-bottom (FC) designs . Large-span cable trays are engineered to support heavy-duty cables over extended distances, often using pultruded FRP profiles or reinforced metals for high load capacity . Typical widths range from 200 mm to 800 mm, with heights from 60 mm to 150 mm, and finishes include pre-galvanized, hot-dip galvanized, or powder-coated surfaces .

Factors Affecting Price

- o Material: Stainless steel 304/316 and aluminum trays are more expensive than galvanized steel due to corrosion resistance and durability .
- o Span and Load Capacity: Longer spans and higher load ratings increase cost, as these require stronger structural profiles and additional accessories like corbels, hangers, and joints .
- o Tray Type: Ladder trays generally cost more than perforated or channel types because of their mechanical strength and ventilation features .
- o Customization: Custom sizes, special coatings, or compatibility with systems like Unistrut can affect pricing .
- o Accessories and Fittings: Elbows, tees, reducers, and grounding components are sold separately and add to the total cost .

How to Obtain Pricing

Since prices are not standardized online, the most reliable way to get a quote is to:

- o Contact Italian manufacturers directly, such as Schiavetti Tekno or Spina Group, through their websites or sales representatives .
- o Request a custom quote specifying tray type, material, dimensions, span, and required accessories.
- o Consider authorized distributors or industrial suppliers who can provide pricing for bulk orders or international shipping.

Additional Considerations

Price of Italian Long-Span Cable Trays

- o Large-span trays are suitable for harsh environments, including high temperature, corrosive conditions, and outdoor installations .
 - o They offer fast installation, easy maintenance, and compliance with EN, UL, and IEC standards .
 - o For industrial projects, it is recommended to factor in installation labor and accessory costs when budgeting.
- In summary, Italian long-span cable trays are premium products with prices that vary based on material, size, and load requirements, and the most accurate pricing is obtained through direct manufacturer or distributor quotes.
