

Price of National Standard Optical Cable Splice Box

Article Overview

Fiber optic splice boxes typically range from \$20 to \$150 for retail units, with wholesale or bulk orders priced lower per unit depending on capacity and material.

Retail Prices

On platforms like Amazon, fiber splice enclosures for small-scale or residential use generally cost between \$20 and \$80 for standard 12-24 core boxes. For example, a 24-core horizontal alloy IP68 waterproof splice enclosure is available for around \$50-\$70, including accessories like trays, waterproof tape, and mounting kits . These enclosures are flame retardant, waterproof, and suitable for overhead, duct, direct burial, or branch connections.

Wholesale and Bulk Pricing

For larger-scale deployments, Alibaba and Global Sources offer factory-direct and bulk pricing. Prices vary based on core capacity, material (plastic or metal), and environmental protection rating. Typical wholesale prices for standard fiber optic splice closures range from \$15 to \$60 per unit, with discounts for bulk orders of 50 units or more . High-capacity or specialized enclosures, such as OPGW joint boxes for pole or tower mounts, may cost more due to durable metal construction and ISO9001 certification .

Factors Affecting Price

- o Core capacity: Higher core count enclosures cost more.
- o Material: Metal enclosures are more expensive than plastic.
- o Environmental rating: IP68 or waterproof designs increase cost.
- o Accessories: Trays, tapes, and mounting kits may be included or sold separately.
- o Order volume: Bulk purchases reduce per-unit cost significantly.

Summary

For individual or small-scale purchases, expect \$20-\$80 per splice box. For commercial or large-scale projects, wholesale prices typically range \$15-\$60 per unit, with higher-end models exceeding \$100 depending on specifications and durability requirements . Buyers should compare suppliers, check product specifications, and consider shipping costs when budgeting.
