

Price of Two-Core Fiber Optic Connector Junction Box

Article Overview

The price of a 2-core fiber optic junction box typically ranges from \$5 to \$20 per unit for standard indoor models.

Pricing Overview

- o Indoor FTTH 2-core junction boxes designed for wall or surface mounting generally cost around \$5-\$15 per unit, depending on brand, material, and included ports (SC/LC) (TopFiberBox) .
- o Flush-mounted fibreglass boxes with 2-core capacity and SC panel protection are slightly higher, often \$10-\$20, due to enhanced durability and dust/water resistance (Amazon.de) .
- o Alibaba bulk options for 2-core FTTH terminal boxes start at \$5-\$10 per unit for orders of 1,000 pieces or more, with customization options available for logos and packaging (Alibaba) .

Key Features Affecting Price

- o Material: ABS plastic is common for indoor boxes, offering durability and impact resistance, while fibreglass or reinforced plastic provides higher protection.
- o Connector Compatibility: Most 2-core boxes support SC simplex or LC duplex adapters, which can slightly influence cost.
- o Installation Type: Surface-mounted boxes are generally cheaper than flush-mounted models due to simpler installation.
- o Additional Features: Cable management, splicing support, and multi-fiber capacity can increase the price.

Recommendations

For residential or small office FTTH installations, a standard ABS 2-core surface-mounted box is cost-effective and sufficient. For commercial or high-durability needs, consider fibreglass flush-mounted boxes with dust and water protection. Bulk purchases can significantly reduce per-unit cost if ordering from suppliers like Alibaba. By considering these factors, you can select a 2-core fiber optic junction box that balances price, durability, and installation requirements.
