

Article Overview

The price of a Xinli Optical Cable Junction Box varies depending on size, port capacity, and supplier, typically ranging from \$20 to \$150 per unit for standard models.

Pricing Overview

The cost of an optical cable junction box, including Xinli models, depends on several factors:

- o Port Capacity and Size: Smaller boxes with 8-16 ports are generally less expensive, while larger boxes supporting 24 or more cores cost more due to increased material and complexity .
- o Material and Durability: Boxes made from premium ABS or UV-resistant materials with IP65 waterproof ratings are priced higher because they offer better protection and longevity .
- o Customization and Splitters: Models integrated with PLC splitters (1x8 or 1x4) or customized configurations for specific network layouts can increase the price .
- o Wholesale vs Retail: Purchasing directly from manufacturers or verified suppliers in China often reduces costs significantly compared to retail prices, especially for bulk orders .

Typical Price Range

- o Small/Standard Units (8-16 ports): \$20-\$50 per unit
- o Medium Units (16-24 ports): \$50-\$100 per unit
- o Large/Customized Units (24+ ports, integrated splitters): \$100-\$150 or more per unit

How to Get Accurate Pricing

- o Contact Suppliers Directly: Platforms like Made-in-China, Alibaba, Mireko, and Qitian provide direct quotes from manufacturers .
- o Request Bulk Discounts: Prices drop significantly for large orders or OEM solutions.
- o Specify Requirements: Include port count, splitter integration, wall or pole mount, and environmental protection needs to get precise quotes.
- o Compare Multiple Suppliers: Ensures competitive pricing and reliable delivery. By considering these factors, you can determine the most cost-effective Xinli Optical Cable Junction Box for your network project while ensuring quality and durability.
