

Price of anti-vibration bracket for splice box

Article Overview

The price of an anti-vibration bracket for a splice box varies widely depending on the supplier, material, and specifications, typically ranging from \$20 to \$100 per unit for standard models.

Overview

Anti-vibration brackets for splice boxes are designed to stabilize fiber optic or electrical splice enclosures, reducing mechanical stress and vibration that could affect cable performance. These brackets often include a supporting angle frame and rubber cushions, along with binding components like belts and tightening members to secure the splice box in place . They are used in both indoor and outdoor installations and may be compatible with vertical or horizontal mounting configurations.

Sources and Pricing

- o Amazon and general anti-vibration mounts: Rubber isolator mounts and shock absorbers suitable for small enclosures or DIY setups are available in sets of 4, typically priced between \$20 and \$50 depending on size and material .
- o Specialized fiber splice enclosures: Some IP68-rated anti-vibration splice closure boxes, which include integrated vibration protection, are sold on platforms like Alibaba. Prices for these high-capacity, rugged enclosures can start around \$50-\$100 per piece, with customization options potentially increasing the cost .
- o Patented anti-vibration brackets: Custom or patented designs, such as the CN219957927U bracket, are generally sold through industrial suppliers or manufacturers. Pricing is often quoted on request due to variations in specifications, order quantity, and shipping .

Recommendations

- o Check industrial suppliers like DigiKey or AFL for compatible brackets and enclosures, as they may provide pricing and same-day shipping .
- o Consider bulk orders if multiple brackets are needed, as unit prices often decrease with larger quantities.
- o Verify compatibility with your specific splice box model, especially if the bracket is designed for vertical or horizontal mounting. In summary, while exact pricing depends on the supplier and specifications, expect to pay roughly \$20-\$100 per anti-vibration bracket, with higher-end or customized models costing more. For precise quotes, contacting suppliers directly is recommended.

Anti-vibration mounts for electrical enclosures The electrical enclosure is constructed as a cabinet or box.
