

Price of electrical distribution box without warning sticker

Article Overview

The cost of a standard electrical distribution box typically ranges from \$20 for small residential plastic units to over \$500 for industrial-grade metal enclosures, with the absence of a warning sticker having minimal impact on the base price.

Residential and Small-Scale Units

Basic residential distribution boxes, often made of ABS plastic or similar materials, generally cost \$20-\$100 depending on the number of circuits and amperage capacity . For example, a 12-way DIN rail ABS distribution box suitable for indoor or outdoor use can be purchased for around \$25-\$50 . These units are usually pre-fitted with transparent covers and insulated shells, and the presence or absence of a warning sticker does not significantly affect the price.

Commercial and Industrial Units

Commercial or industrial distribution boxes, which may be made of powder-coated steel, stainless steel, or reinforced polyester, are more expensive due to higher durability, larger capacity, and advanced features such as IP65/IP66 protection, fire resistance, and modular design . Prices for these units typically range from \$200 to \$500 or more, depending on size, material, and internal components. Empty enclosures without circuit breakers or warning stickers are at the lower end of this range, while fully equipped units cost significantly more.

Factors Affecting Price

- o Material: Plastic (ABS) is cheaper than steel or stainless steel .
- o Capacity: Number of circuits and amperage rating directly influence cost .
- o Protection Rating: Weatherproof or IP-rated boxes for outdoor use are more expensive .
- o Size and Features: Larger boxes with modular or smart monitoring capabilities cost more .

Key Takeaway

For a distribution box without a warning sticker, the price is essentially the base cost of the enclosure. Small residential plastic boxes start around \$20-\$50, while industrial-grade metal or modular units can exceed \$500, depending on specifications and protection features . The sticker itself is a minor accessory and does not significantly alter the overall cost.
