

Price of finished cable tray relocation elbow

Article Overview

Cable tray relocation elbows typically cost between \$1.30 per piece for basic galvanized or stainless steel elbows to \$30-\$50 for specialized aluminum or custom elbows.

General Pricing

- o Bulk industrial elbows: Around \$1.30 per piece for galvanized or stainless steel, suitable for standard industrial cable management .
- o Factory-direct elbows: Prices vary depending on manufacturer and customization, with options for OEM services and bulk orders .
- o Aluminum ladder tray elbows: Horizontal elbows with rail heights of 4"-7", widths of 6"-36", and radii of 12"-36" are available, typically at higher prices due to material and design .

Factors Affecting Price

- o Material: Galvanized steel is generally the most affordable, stainless steel is more corrosion-resistant, and aluminum is lightweight but more expensive .
- o Size and radius: Larger widths and radii increase material usage and cost .
- o Type of elbow: Horizontal, vertical, or custom angles can affect pricing .
- o Quantity: Bulk purchases often reduce per-piece cost, while single or custom orders may be higher .

Practical Considerations

- o For industrial or commercial projects, consider both the elbow cost and installation complexity.
- o Custom or high-durability elbows for outdoor or corrosive environments may cost significantly more than standard indoor fittings.
- o Always confirm with suppliers for shipping, taxes, and lead times, especially for international orders . In summary, for standard cable tray relocation elbows, expect \$1.30-\$5 per piece for common steel options, while aluminum or custom elbows can range from \$30-\$50 or more, depending on specifications and supplier .

Buy in bulk around \$1.3 cable tray elbows, available in galvanized and stainless steel. Ideal for industrial use and cable
