An SC adaptor, or Subscriber Connector adaptor, is a device used in fiber optic networks to connect fiber optic cables together or to devices like transceivers, optical receivers, and routers. They play. The SENKO SC Connector ranges are renowned for their versatility and reliability in high data transmission applications. The SENKO SC Connector is highly configurable to meet most application requirement, is designed to meet the IEC 61754-4 standards, and is typically tested to GR-326 to provide. SC fiber-optic cable connectors are widely used in optical network applications, such as internet and cable TV. The name comes from the shape (square connector), although it is actually a rectangular connector. Featuring a convenient push-pull mechanism, the SC Series is designed for single-mode, multi-mode, and APC applications and offers the most reliable optical fiber connections for Telecom. The SC adapters are designed and manufactured according to JIS, IEC, EIA/TIA and ANSI specifications for intermateability and optical performance. The ordering code allows exact.

This adapter is commonly used in patch panels, enclosures, and wall plates, thanks to its easy-to-install, snap-in design that ensures a secure fit in any fiber optic
