

Safe Operations When Climbing Communication Towers

Preview

Employees climb communication towers to perform construction and maintenance activities and face numerous hazards, including fall hazards, hazards associated with structural collapses and improper rigging and hoisting practices, and "struck-by" hazards. Pursuant to the OSH Act, employers must comply with safety and health standards and regulations issued and enforced either by OSHA or by an OSHA-approved state plan. The Division of Occupational Safety and Health (DOSH) is concerned about the risks faced by employees in the communication tower industry. It includes lightning protection, grounding, surge devices, and safety protocols that require continuous maintenance and compliance with standards. Failure to keep all. OSHA Booklet Compiles Best Practices for Communication Tower Work OSHA, in collaboration with the Federal Communications Commission (FCC), recently published a booklet () that provides safety information and best practices for preventing injuries among communication tower workers. OSHA News Release, (February 11, 2014).
