To find the best router for fiber internet, we used our expertise to select items based on key specs, such as speeds, coverage, wireless standards, security, weight, and additional features. We conduct in-house testing to check their signal strength, speed, and file. Upgrading to a router built for fiber optic means matching multi-gig WAN ports with a backplane that can actually forward packets at wire speed, not the sub-1 Gbps ceiling older hardware imposes. I'm Fazlay Rabby -- the founder and writer behind Thewearify. For years I have tracked the latency. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. After reviewing seven models built around tri-band architectures, multi-gig WAN ports, and the latest WiFi standards, I've narrowed down the field to the best fiber optic router options that eliminate lag and maximize your internet investment. All Recommend Top Picks Can any router work with fiber optic? Related reviews SH Score is a ranking. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price tag. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity.
